

Business Class Voice over IP next generation networks

**Voice over IP** is a cost effective, flexible way for businesses to communicate. High-performance, high quality, total resilience.

### Benefits from Installing iLine...

- ▶ Integrated **Disaster Recovery** should the worst happen
- ▶ Ongoing **cost savings** on your telephone call charges
- ▶ Vastly reduced installation and line rental charges
- ▶ Network branch sites or customers for free calls
- ▶ **21CN compliant**, therefore your number for life

### Features delivered as standard with every iLine...

#### ▶▶ **Disaster Recovery**

**iLines** are enabled with a unique integrated Disaster Recovery programme. Each site telephone number can be immediately diverted to an alternative number, typically a mobile, in the event of a power failure or other crisis. **iLine** – ensuring business continuity and the highest level of service. Install **iLine** as your primary bearer or as a supplement to your current ISDN.

#### ▶▶ **21CN Compliant**

BT are upgrading your telephone lines to a new IP network known as 21CN. During this upgrade you could experience regular disruption to your telephone service. There are no guarantees that your existing equipment will be compatible with 21CN or that you will be able to keep your number. Migrating to **iLine** you can guarantee 21CN compliance and you will secure your number.

#### ▶▶ **Cost Savings**

**FREE CALLS** – now that's a saving!! Site to site calls are free, therefore it's a must if you operate from more than one location. Breakout calls to all other locations at rates guaranteed to improve your bottom line. Initial installation costs of up to half that of equivalent BT ISDN with no commitment. If linked to a modern IP enabled telephone system your organisation could also benefit from a centralised operator, voicemail, and unified messaging.

#### ▶▶ **Number portability**

**iLine** provides telephone numbers for life. Once migrated your number can be located anywhere in the UK, thus avoiding reprint marketing costs should your business move location. Flexibility is the key to business success – scaleable from 4 to 64 concurrent calls, easily duplicated to encompass additional locations and number portability across the whole of the UK.

*All benefits described are not promotional, these are guaranteed*
